DETAILED ACTION

Reasons for Allowance

The following is an examiner's statement of reasons for allowance: claims 1 and 21 and their respective dependent claims are allowable because the recitation of the pads tapering, or becoming progressively smaller, from the heel to the cuff of the sock and the two spacer pads extending distinctly outward from the outer surface of the sock relative to the transition piece that extends from one spacer cushion pad to the other.

The references of Litman (US 3,003,154), Segesser (DE 10305277) and Bertheas (FR 2607383) all teach pads for use on a foot article, but fail to teach specific limitations required by the independent claims 1 and 21.

The US patent to Litman fails to teach two cushion pads and a transition piece extending outwardly from the outer surface of the sock. The spacer cushion pads extending outwardly distinctly from the outer surface of the sock relative to the transition piece and the transition piece extending between the two spacer cushion pads.

The French patent to Bertheas and the German patent to Segesser fail to teach two spacer cushion pads extending outwardly from the outer surface of the sock and tapering, or progressively become smaller, from the heel portion to the cuff portion.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Drawings

The drawings filed on 05/11/05 are acceptable subject to correction of the informalities: the lettering and identifier numerals provided in figure 1 and 2 have uneven line thickness and in some instances are unclear. In order to avoid abandonment of this application, correction is required in reply to the Office action. The correction will not be held in abeyance.
